"German Syrup"

A Cough
and Croup
Medicine.

For children a medicine should be absolutely reliable. A mother must be able to pin her faith to it as to her Bible. It must contain nothing violent, uncertain, or dangerous. It must be standard in material and manufacture. It must be plain and simple to administer; easy and pleasant to take. The child must like it. It must be prompt in action, giving immediate relief, as children's troubles come quick, grow fast, and end fatally or otherwise in a very short time. It must not only relieve quick but bring them around quick, as children chafe and fret and spoil their constitutions under long confinement. It must do its work in moderate doses. A large quantity of medicine in a child is not desirable. It must not interfere with the child's spirits, appetite or general health. These things suit old as well as young folks, and make Boschee's German Syrup the favorite family medicine.

DEAFNESS,

ITS CAUSES AND CURE,

Scientifically treated by an aurist of world-wide

reputation. Deafness eradicated and entirely

cured, of from 20 to 30 years' standing, after all

other treatment have failed. How the difficulty is

reached and the cause removed, fully explained in

circulars, with affidavits and testimonials of cures

from prominent people, mailed free.

Dr. A. FONTAINE,

34 West 14th St., N. Y.

Sunday Travel in the Metropolis.

One of the wonderful sights to be seen

in New York at this season of the year is the

throng of variegated humanity that

flows into the city in the early evening

of Sunday. This crowd is composed of

the middle and lower classes chiefly, who

flock to the country north of Harlem, to

the ferries, to the railway stations, to the

boats on river and bay, during Sunday

forenoon to enjoy the only holiday they

have in the week. Men, women and

children of all ages and every nationality

are to be seen and numbered by tens and

hundreds of thousands. The elevated

trains from Harlem, between the hours

of 6 and 9 o'clock in the evening, swarm

with these flushed pleasure seekers.

And the fun and flowers! There is

nothing like it elsewhere upon top of

earth. Nearly every other woman and

child comes in literally laden with flow-

ers and grasses, and the usually stuffy

air of the cars is redolent with the deli-

cious perfume of field and farm. They

tell the story of a delightful day spent

beyond the oppression of brick and mor-

tar and blazing stone. Separating here

and there along the route, the atoms of

these countless human swarms bear the

evidences of their day's pleasure in their

browned faces and buoyant steps to their

homes. It is a charming sight, and one

never to be forgotten by the beholder.

It testifies with irresistible eloquence

of the future grandeur of the American

metropolis, that has so much variety

within easy reach and at so small a price

that the poorest laborer can enjoy it.—

New York Herald.

New York's Wholesale Homes.

It may be that in the fullness of time

the man who owns and runs his own

private house may be regarded as quite

as luxurious and extravagant a person as

he who now owns and uses a private car

or a private steamship. Certainly in this

city the tendency is very marked toward

a modified and rational type of socialism

in dwellings. To that extent Bellamy is

justified by the practical common sense

of the age. I am prompted to these specu-

lations by the fact that the announce-

ment is made that another \$1,000,000 hotel

is immediately to be erected on the

west side of the park.

The new hotel is to be 165 feet high, or

fourteen stories, is to be a full block

front, to contain 600 rooms, and to be

provided with every modern improve-

ment and elegance. This makes the

fourth, and I am not sure but the fifth,

\$1,000,000 hotel that is now going up in

this city. Where the movement will

stop no one can tell, but there seems to be

no end to the erection of these monster

wholesale homes, and they seem to be

successful in the ratio of their magni-

tude and expense.—New York Cor

Washington Star.

And Still He Is Hungry.

The biggest eater in the United States

lives at Bridgeport, near Martin's Ferry.

His name is Ed Lyle. He attended the

Foresters' supper and social, and said he

could eat more than any man in the hall.

Harry Eberly accepted the challenge,

but soon threw up the sponge. Lyle

continued to eat for two hours and fifteen

minutes. He ate all the chicken, cake,

pickles and everything else that was on

the table, and drank a coffee pot of coffee

and called for more.

Lyle says that he had eaten a peck of

apples before he began and did not expect

to eat anything when he entered the

hall. He says he will eat against any

man living, and will wager that he can

eat more than any man in the world.

Usually he is not an uncommon eater,

but these spells come on him every few

months. He has been known to eat a

large ham just before retiring, five quarts

of oysters at night and so on. Lyle is a

teamster and enjoys good health.—Cleveland Plain Dealer

A Quaker Bird.

James Funk a few days ago showed us

the skull of a bird which he found in the

Santiago creek after the freshet. He

believed it was washed down from the

mountains. The skull measured seven

inches from side to side, and fourteen

inches from its base to the end of the

beak. The cavity of the skull was large

enough to hold a quart. The upper

mandible was formed like that of a

goose, but of course was much longer,

and had been provided with a row of

teeth on each side, but all of these were

missing. The lower mandible was also

missing. The eye and ear cavities were

very large. Mr. Funk took the skull to

Los Angeles to submit it to some of the

naturalists there to see if they could

classify the bird to which it belonged.

The specimen was in a good state of

preservation.—Orange (Cal.) News.

It is estimated that the wealth of the

United States now exceeds the wealth of

the whole world at any period prior to

the middle of the Eighteenth century.

H. J. THYES,

THE CARSON MINT.

There is weeping and wailing and "cussing" the Administration at Carson. An order from the Treasury Department stops the coinage of silver and reduces the Mint force at the capital of Nevada. This will throw several persons out of employment and restrict the circulation of coin several thousand dollars per month in that city.

This is one of the effects of the Sherman Commodity Act of last July, which the Carson papers and, in fact, every Republican paper in the State, insisted during the campaign last Fall was better than free coinage, and which doubtless very many of their readers believed. That Act leaves it to a great extent discretionary with the Treasury Department whether the coinage of \$2,000,000 or any part of that amount shall be coined monthly and that Department decides that no more silver shall be coined in Nevada at present.

This is the reward Nevada receives for placing Republican success above the prosperity of the State. A year ago, when a silver convention, composed largely of business men from all parts of the State, was held at Carson, not an employee of the Mint or of the Virginia and Truckee railroad participated in the proceedings or countenanced the convention in any way, because it declared for free coinage or nothing. The Mint men kept away because the Administration was opposed to free coinage, and the railroad shunned it because D. O. Mills visited Carson a few days before the convention and let it be understood that he was a gold bug, though the business of his road depends almost exclusively on the prosperity of the mining industry. Now the Mint employees and the business men of Carson are taught an object lesson on the silver question which they will not soon forget, because it will touch their pockets, and it may be the means of disclosing to them the great importance of free coinage, not only to miners and farmers, but to men of every business and occupation in Nevada.

THE DISPOSITION OF CHINESE.

There is a conflict of authority between the Judicial and Treasury Departments regarding the disposition of three Chinese who were smuggled into Detroit from Canada. The Treasury Department instructed Collector Hopkins of the Port to ship the Chinese to San Francisco to be deported to China. Before this could be done the Court had to declare that the Chinese did not belong in the United States. Commissioner Graves ordered the Chinese sent back to Canada, whence they came, instead of to San Francisco as directed by the Treasury Department. The Commissioner claims that he complied with the provision of the Exclusion Act, which says "Chinese shall be returned to the country from which they immediately came," and not to their native country. As the Chinese by direction of the United States Commissioner were sent to Windsor, Canada, and are now out of the jurisdiction of the United States, the order of the Treasury Department to take them to San Francisco can not be complied with.

The open violation of the orders of the Treasury Department has caused some excitement in official circles, and there is much speculation as to what it will do in the matter. The Commissioner complied with the law, but Treasury officials sometimes set their opinions and orders above the law, and may in this case cause the Commissioner trouble for disobeying orders, though in doing so he adhered to the strict letter of the law.

A GOLD BUG ARGUMENT REFUTED.

The San Francisco Bulletin, though published in a city whose palaces have been built with the product of the silver mines of Nevada, is as thoroughly imbued with gold bug ideas as the New York Tribune or any of the Administration organs in the East. Like its Eastern gold bug friends its arguments against silver are always illogical and frequently silly.

The Examiner disposes of one of its owl utterances as follows:

An evening contemporary which knows a whole encyclopedia full of things that are not so, remarks that if free silver coinage were permitted "a man who had to meet a debt of \$100 and who had the gold in hand for that purpose would not pay in silver." On the contrary he would. Let us say, \$125 in silver, send him to the Mint, get \$125 in standard gold, and let the Mint, for \$100 in gold, pay him his \$125 in silver and pocket the rest.

So he would, if he could; our contemporary omits to tell where he would find a miner so accommodating as to sell \$125 worth of silver for \$100 when he could send it to the Mint himself and get 125 standard dollars for it. The obvious truth is, that under free coinage there could be no wide margin between the price of gold and silver unless all the gold in the country had been forced out of circulation.

SEARCHING FOR TRICHINÆ.

Bismarck, when all powerful in Germany, prohibited the importation of the American hog and its products on the ground that the animal is diseased. The United States Government made an appropriation of \$300,000 to examine pork at the principal packing establishments of the country to ascertain to what extent, if any, it is infected with trichinæ. Expert microscopists, engaged by the Government

under the direction of the Secretary of Agriculture, have been inspecting hogs slaughtered at Chicago packing establishments within the past week. Their official report is not yet published, but Professor Michaels, one of the experts, says the examination proves that many hogs are infected. Three days' inspection under the microscope has revealed more trichinæ than the experts expected to find, but they do not care to inform the press of the number of hogs infected, as it might cause alarm. Meat from two hundred hogs were examined in one day. As the corps of inspectors is increased the examination will become more general, and will doubtless affect the packing business.

As pork, especially that packed in Chicago, will not be relished as heretofore, the inspection of hogs will have a tendency to increase the demand for beef and mutton, and in that way it will benefit the stockmen of the west.

A Carolina Mountains Romance.

From Tomatola, N. C., comes the story of the marriage of Alphens Badham and Mrs. Grayling. Mrs. Grayling's husband had been dead but a few months, and her new husband is one whom she had long mourned as dead.

When the war broke out she lived near Raleigh, where Grayling and Badham had been her neighbors and admirers. Both went to the front, but the lady became the wife of Badham before his departure. When hostilities ceased Grayling returned, but could give no account of his companion, who must have fallen in battle. Later, feeling assured that her husband was dead, Mrs. Badham became the wife of Grayling, and the couple removed to Tomatola, where they purchased a farm.

Badham had been taken prisoner, and after his release from Camp Morton lingered in the north. Later he longed to see his wife, and, returning, traced her to the home where she had become the mother of a large family by another man.—Cor. Atlanta Constitution.

A Wonderful Child.

Mr. S. L. Smith, the editor of the Silver Lake Signal, at Silver Lake, on the line of the C. W. & M. railway, is the father of a child who is creating a great deal of excitement in his neighborhood by his wonderful and astonishing powers of what the father is inclined to think is mesmerism. The boy is almost seven years of age, and is capable even now of performing any of the feats of the famous Davenport brothers—rope tying, chained box trick, table rapping, reading sealed letters, slate writing, moving tables with heavy weights on them, &c. The little fellow may be bound hand, foot and neck to a chair, and in five seconds will liberate himself without untying a single knot, no matter how securely he is bound. These and many other mysterious feats which he performs have given him the title of "Spirit Child." His powers are all natural, having been in no way developed.—Cor. Indianapolis News.

Don't Demand the Earth.

If you go to the country don't look for all the city conveniences. There is a vague idea that country people pay little or nothing for many things; therefore the stranger expects a great deal for a small expenditure. While it is quite true that the actual cost of living is much less on a farm than in town, still there are items of expense greater in the country. City improvements when grafted on country life become expensive luxuries, just as irreproachable cream, butter and eggs are the most costly items of city housekeeping. We would feel justly hurt if some farmer folk boarding in our New York home should expect a large tennis court, quantities of flowers, fruit and rich milk without seeing that these made a drain upon the household finances. So exercise a little common sense yourself.—Ladies' Home Journal.

Justifiable Homicide.

Perhaps the queerest lawsuit on record—one that deserves a place in the legal records of Georgia—was that which was recently decided in Morgan county. A drummer hired a mule and buggy to go into the country. The mule became contrary and balked the buggy in the fence jam. The drummer plied whip and the mule kicked back. The mud flew, but the drummer held his own.

When patience ceased to be a virtue the commercial gentleman drew from his pocket a Smith & Wesson howitzer and killed the long eared source of danger. The owner of the mule brought suit against the drummer for the value of his quadruped, whereupon the jury brought in the following verdict: "We, the jury, find the defendant not guilty, and the killing a case of justifiable homicide."—Columbus Enquirer.—Jun.

Cigarette Hearts Not Very Useful.

An autopsy on the body of young Potter, who was drowned in the bay at San Diego, developed the fact that he forfeited his life to the cigarette habit. It was found that he had a very pronounced case of "cigarette heart." The smoke causes the valves of the heart to harden, and extra effort of any kind results in the death of the victim.—Cor. San Francisco Chronicle.

In Paris the literary women have organized an association known as the Union des Amies des Lettres and elected Mme. Vattier d'Ambrosio president. Literary soirees will be regularly held and in time the salon revived.

Forsyth county, in Georgia, has developed an infantile prodigy, who at four years of age can read difficult music correctly at sight. His voice is soft and tuneful and he bids fair to become famous.

Plans proposed for irrigation both in Upper and Lower Egypt during the period of low Nile include the building of a high barrage across the river at the first cataract. Great opposition has been excited against this proposition, as it involves the submersion of the beautiful island of Philoe and its magnificent monuments for several months each year.

IMPRESSIVE CEREMONIES.

The Nineteen Sailors Buried at Mare Island.

Special to the Journal.

VALLEJO, Cal., June 27.—The bodies of the nineteen sailors who were drowned in the great Samoan storm were buried at Mare Island to-day with imposing ceremonies. The remains of the nineteen men were taken to the cemetery, seven in one hearse and twelve on a caisson constructed of gun carriages. The escort consisted of a battalion from the United States Marine Corps, a company of sailors from the Independence, Commander Bessan, a detachment from the French frigate Daboudou, members of Farragut Post No. 4, G. A. R., Rear Admiral John Irwin and staff, and Commander Wilson, U. S. N., a survivor of the disaster. The line was preceded by the Independence band, which played martial music. The entire escort was under the charge of Commander C. E. Clark, U. S. N. At the graves the services were conducted by Chaplain J. R. Lewis, and were impressive. At the conclusion a parting salute was fired over their graves and the last call sounded by the bugle.

DESOLATION AND RUIN.

Raining Nearly Three Inches an Hour.

Special to the Journal.

DES MOINES, Iowa, June 27.—A heavy rain storm struck this city this afternoon. Rain fell at the rate of nearly three inches an hour, soon flooding the streets. For awhile the wind blew seventy miles an hour. Trees were broken and some of the streets are littered with branches. Several buildings were unroofed and otherwise damaged. Reports from the surrounding towns show the storm was even more severe north and west of Des Moines. Considerable damage was done to grains.

HOLSTEIN, IOWA, June 27.—Another most disastrous storm occurred yesterday. Lightning and hail have done irreparable damage in this section to crops and cattle. The district stricken by hail is three miles wide and ten miles long. Barley is almost totally destroyed. Wheat and oats are damaged at Cushing and Oakesville and the houses flooded. Two children were drowned at Correctionville, and lightning killed Chris. Kinn. The whole country in this vicinity is a picture of desolation and ruin. Hogs, cattle and horses in large numbers are seen floating down the river.

DESTRUCTION IN KANSAS.

Special to the Journal.

EMPORIA, Kan., June 27.—Word has just been received in this city of great damage caused by the heavy rains of Thursday in this and adjoining counties. Many farms have been entirely flooded and barns, implements and entire crops are washed away. On the farm of John Stoller, on Jacobs creek, large orchards were destroyed. The storm also did great damage to buildings at the Taylor ranch; many fat hogs and poultry were lost. People were compelled to flee for their lives to high land and property was destroyed. All the farms about this place are submerged. At Stoder's mill just below Emporia, the Cottonwood is out of its banks and spread over the country for miles. In the flood as it passes, may be seen all kinds of wreckage of barns, parts of all kinds of farm machinery, wheat in abundance, and here and there a piece of drift wood, or a wagon bed or dead animal. The flood is now subsiding.

Shot by Order of a Woman.

Special to the Journal.

PLACERVILLE, Cal., June 27.—In a dispute over the value of property destroyed by fire caused by a spark from an engine on the Northern railroad, David Carter, who was sent to adjust the loss, was shot through the arm. Mrs. Pugh, owner of the property, called Carter a liar. He retaliated in kind, when she procured a pistol and ordered her husband to shoot Carter. The latter tried to get away but got caught on a wire fence and was shot.

A New Dynamite Gun.

Special to the Journal.

MANCHESTER, June 27.—A private exhibition was given here to-day of a gun invented by J. E. Bott, an engineer. Details as to the design, etc., are kept a profound secret until American and continental patents are secured. The principles of the gun are pneumatic, and it is claimed it will surpass the Salisaki gun, throwing fifty pounds of dynamite three miles.

Practical Training at the Navy Department.

Special to the Journal.

WASHINGTON, June 27.—Admiral Waller has been directed by Secretary Tracy to prepare a programme of maneuvers for Summer and early Autumn which will dispose of the forces under his command to the best advantage, and confer practical training under conditions following as closely as possible actual warfare. According to the program laid, we are to have for the first time in the history of the country a series of naval maneuvers, involving problems of actual warfare, as presented in an attack of one of our great maritime ports by a foreign naval force and defense by the American Navy. The Venturino torpedo boat Cushing and the monitor Miantonomah will take part in the maneuvers.

It May Be Cardinal Gibbons.

Special to the Journal.

BERLIN, June 27.—References made to letters from Rome regarding the candidature of Cardinal Lavigier to the Holy See, have aroused the antagonism of the Germans to the idea of the French Pope. Krens Zeitung holds that it is probable the successor to Leo XIII. will be drawn from the Italian Cardinals, and if the next Pope be not an Italian, the choice of the Conclave will be Cardinal Gibbons, of the United States, against whom neither national jealousies nor internal clerical differences can operate.

The World Enriched.

The facilities of the present day for the production of everything that will conduce to the material welfare and comfort of mankind are almost unlimited, and when Syrup of Figs was first produced the world was enriched with the only perfect laxative known, as it is the only remedy which is truly pleasing and refreshing to the taste and prompt and effectual to cleanse the system gently in the Spring-time or, in fact, at any time, and the better it is known the more popular it becomes.

Grand Jury.

All members of the present Grand Jury are hereby notified to be and appear at the court-house on Monday, June 29, 1891, at 10 o'clock A. M.

W. R. CHAMBERLAIN, Foreman.

WHAT IS SCROFULA

It is that impurity in the blood, which, accumulating in the glands of the neck, produces unsightly lumps or swellings; which causes painful running sores on the arms, legs, or feet; which develops ulcers in the eyes, ears, or nose, often causing blindness or deafness; which is the origin of pimples, eruptions, or the many other manifestations usually ascribed to "humors," which, acting upon the lungs, causes consumption and death. Being the most ancient, it is the most general of all diseases or affections, for very few persons are entirely free from it.

How Can CURED

By taking Hood's Sarsaparilla, which, by the remarkable cures it has accomplished, often when other medicines have failed, has proven itself to be a potent and peculiar medicine for this disease. Some of these cures are really wonderful. If you suffer from scrofula, be sure to try Hood's Sarsaparilla. "My daughter Mary was afflicted with scrofula, a sore neck from the time she was 22 months old all she became six years of age. Lumps formed in her neck, and one of them after growing to the size of a pigeon's egg, became a running sore for over three years. We gave her Hood's Sarsaparilla, when the lump and all indications of scrofula entirely disappeared, and now she seems to be a healthy child." J. S. CARLISLE, Nauright, N. J.

The river at Linkville, Ore., was so
empty the other day, as a consequence of
the heavy, steady south wind blowing
across the lake, that the trout could be
seen everywhere flopping in the water
holes. The boys went a-fishing with
clubs
